Press Release

By Popular Demand!

Wauconda, IL:

Fall of 2009 found dealers and consumers ooh'ing and ahhh'ing over the new "E/Z Bender Wire Forming Tool" from DU-BRO. While the response was overwhelming, there was a recurring question. Everyone wanted to know if it would bend/form .062" to .093 (2-56 – 4-40) wire. Well, at that time it could not. But, in typical DU-BRO fashion, our engineers hit the drawing board and we were in production before the ink was dry on the original #480.

The all new #481 "E/Z Bender #2" will bend the larger sizes from .062" to .093" with ease and will make the same quality "Z-Bends", "L-Bends" and more. This tool is a must have for any modeler and it's uses are virtually endless. Be sure to visit www.dubro.com/hobby to learn more and to get one for your shop.

No. 481 E/Z Bender Wire Forming Tool #2 Retail: \$24.95

For Release, April 2010
